

# The Oracle MICROS Workstation 625X and 655X

The next generation Oracle MICROS Workstation 6 Series builds on Oracle's proven hardware platform, providing increased performance capabilities for a superior customer and associate experience.

## HARDWARE BUILT STURDY, SMART AND STYLISH FOR RETAIL

The retail environment is demanding and you need a hardware solution with modern features that can withstand the demands of hard day-to-day use. Our hardware is built with the processing power and durability you need to operate at the speed of your business. It also looks good, featuring a stylish, modern design and a slim footprint.

## KEY FEATURES

Oracle Workstation 625X and 655X deliver the functionality, stability, durability, and modern design you have come to trust and depend on from the Oracle MICROS workstations. Building on the long-established industry-proven hardware platform with innovative features that focus on simplifying daily staff tasks, strengthening core functions that support operations, and engaging guests with customer-facing technology to deliver the individualized experience they expect.
